### EXAMINER'S AMENDMENT

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Mr. Curtis Behmann on 9/21/07.

The application has been amended as follows: Please replace claim 10 with the following claim:

10. (Amended) The method of claim 9 8, wherein the noise component is introduced as perturbation to a magnitude of an audio segment component in the frequency domain, further comprising the steps of:

transforming the audio segment component from the time domain to the frequency domain;

calculating the magnitude of each frequency component of the audio signal component;

determining a magnitude and sign for each frequency component perturbation; perturbing each frequency component by the determined frequency component perturbation;

quantizing each perturbed frequency component; and,

transforming the audio segment component back to the time domain from the frequency domain.

2. The following is an examiner's statement of reasons for allowance: Claims 1-5, 8, 10-13, 17-21, and 23-29 are allowed. Applicant teaches a method of transmitting an audio stream, comprising estimating a perceptual mask for the audio stream, the perceptual mask being based on a human auditory system perceptual threshold, dynamically allocating a hidden sub-channel below the estimated perceptual mask for the audio stream, the dynamic allocation being based on characteristics of the audio stream, and generating a composite audio stream, the composite audio stream including uncoded narrowband components of the audio stream for which the perceptual mask was estimated, the composite audio stream further including additional payload in the hidden sub-channel, the uncoded narrowband components of the composite audio stream being audible to a human ear at a receiver without decoding, an, transmitting the audio stream. The cited prior art alone or in combination does not teach or fairly disclose the claimed combination of features.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Vijay B. Chawan whose telephone number is (571) 272-7601. The examiner can normally be reached on Monday Through Friday 6:30-3:00.
